.: Digital Audio player

The Aigo A215 player is characterized by excellent design and technical features, including WMA10/DRM10 technology that allows customers to download secure music from the Internet. This portable player also boasts up to 50 hours playback from only one AA battery. Other features include a cool blue backlit LCD screen which displays the name of the tracks and artists while playing, 6 preset equalizers, and the capability to store any type of data. On top of user friendly features, the Aigo A215 is very easy to use, which makes it stand out from the other players available on the market. Also included in the box is a video tutorial, which is designed to guide consumers through installing the player and transferring tracks so everyone can get the best out of this fantastic digital device.

Listen to music
